forest landowners, but for all Americans. Land managers across the country are already feeling the pressures of a changing climate and its effects ... Wed, 31 Jan 2018 23:55:00 GMT Climate Solutions | USDA - Abstract. Better stewardship of land is needed to achieve the Paris Climate Agreement goal of holding warming to below 2 °C; however, confusion persists about the specific set of land stewardship options available and their mitigation potential. Wed, 05 Dec 2018 07:34:00 GMT Natural climate solutions | PNAS - Climate change affects the social and environmental determinants of health – clean air, safe drinking water, sufficient food and secure shelter. Between 2030 and 2050, climate change is expected to cause approximately 250 000 additional deaths per year, from malnutrition, malaria, diarrhoea and ... Climate change and health - who.int - 1. Introduction. Reducing risks to food security from climate change is one of the major challenges of the 21st century. The impacts of climate change on crop yield can already be detected in observed data (Lobell et al., 2011). Climate impact studies on crops predominate, but impacts on fisheries and livestock production are no less serious (Creighton et al., 2015, Herrero et al., 2015). Reducing risks to food
