Sat, 08 Dec 2018 04:10:00 GMT the light in the wound pdf - BASIC WOUND MANAGEMENT OF HORSES -The basic nature of horses seems to put them at risk for traumatic injuries. One of the most common reasons that clients present their horses to the veterinarian is trauma that results Thu, 06 Dec 2018 23:25:00 GMT BASIC WOUND MANAGEMENT OF HORSES - A wound is a type of injury which happens relatively quickly in which skin is torn, cut, or punctured (an open wound), or where blunt force trauma causes a contusion (a closed wound). In pathology, it specifically refers to a sharp injury which damages the dermis of the skin. Fri, 07 Dec 2018 18:38:00 GMT Wound - Wikipedia - A burn is a type of injury to skin, or other tissues, caused by heat, cold, electricity, chemicals, friction, or radiation. Most burns are due to heat from hot liquids, solids, or fire. While rates are similar for males and females the underlying causes often differ. Among women in some areas, risk is related to use of open cooking fires or unsafe cook stoves. Any wound may become infected with a variety of bacteria. A culture helps to determine whether a wound has become infected, which type(s) of bacteria are causing the infection, and which antibiotic would best treat the infection and help heal the wound.
